

# PolyField Track

A results viewing and display software package for FinishLynx and TimeTronics Photo Finish systems.

Runs on Windows and Mac as a desktop device linked to your photo finish results folder.

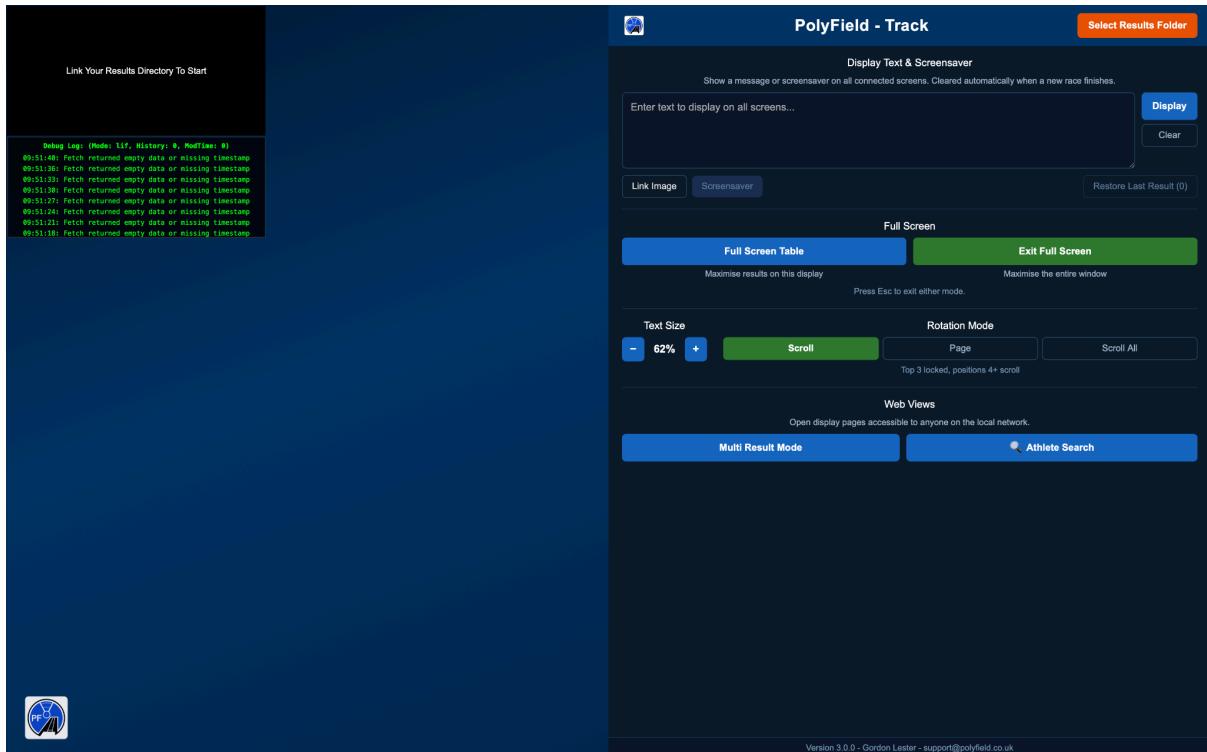

Enables a web based user interface for any device on the network to display results in multiple formats and a self service kiosk mode for athletes to search their own results.

Keeps the operator in control, only displaying once a result is saved to ensure positive validation of results prior to display. Multiple saves are supported, enabling early display of athletes in distance races, or display once the top 3 athletes have performances assigned.

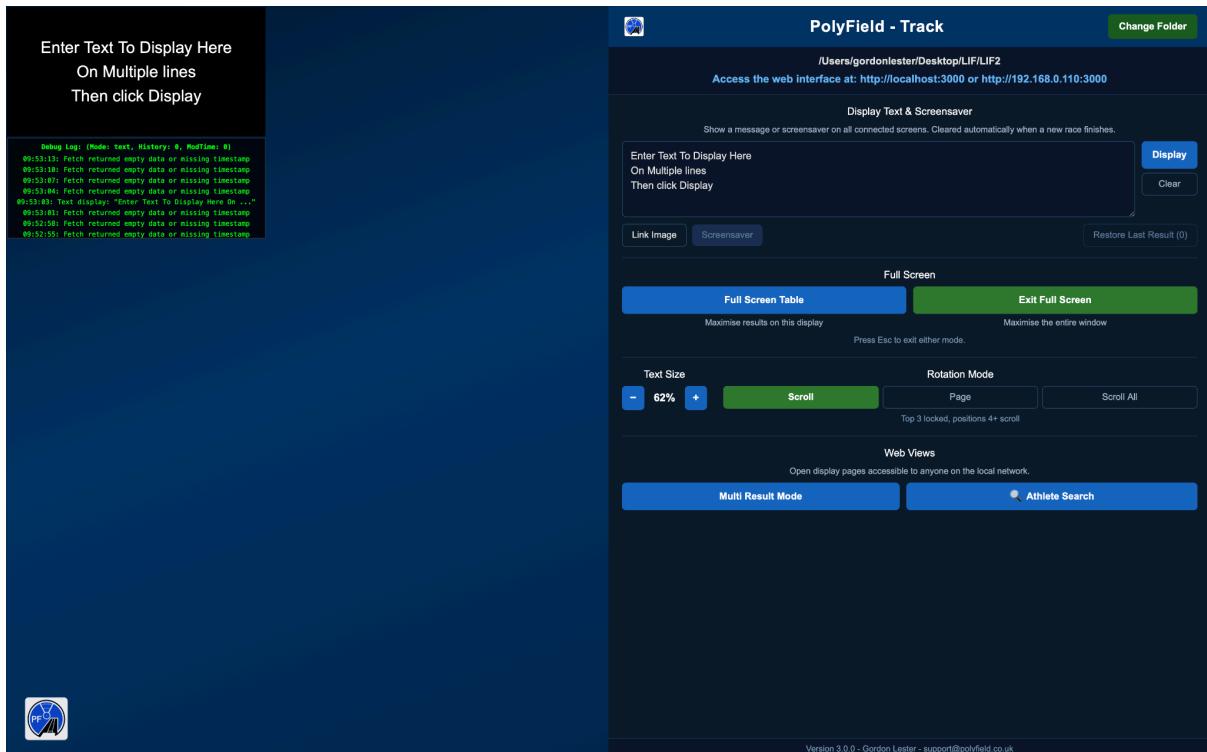

Download from - [www.polyfield.co.uk](http://www.polyfield.co.uk)

## How it works

First set the results directory, this is the folder FinishLynx or TimeTronics will save your results into (LIF etc). Click the red button in the top right corner, "Select Results Folder"

Once set the web user interface will build and access details will be displayed. You only need one instance of the software to be running, multiple displays are supported with the maximum being determined by your network and computer running the software.

You can change the results folder once set by re-visiting the top right button "Change Folder"

Whilst the desktop app can perform all functions, it is advisable to leave it on this screen and use a separate device or second screen connected to the web interface, leaving you in control of the Screensaver and Text display functions. These enable you to display graphics or text messages on the connected displays, engaging your spectators. Sponsor graphics etc can be shown this way. You can cancel the graphics using the clear button, or wait for the next Save to a result file, this will override the graphics and return to the result displays.

The default text size can be adjusted with the + and - buttons.

The rotation mode will determine how results with more than 8 competitors will display:

Scroll: Top 3 rows are locked, rows 4+ will scroll through the remaining competitors.

Page: Result will paginate showing 1-8 then 9-16 etc on rotation basis.

Scroll All: All 8 rows will scroll through the competitors with no locked positions.

The web views are best accessed through the web interface using the access details provided at the top of the desktop app.

### Multi Result View

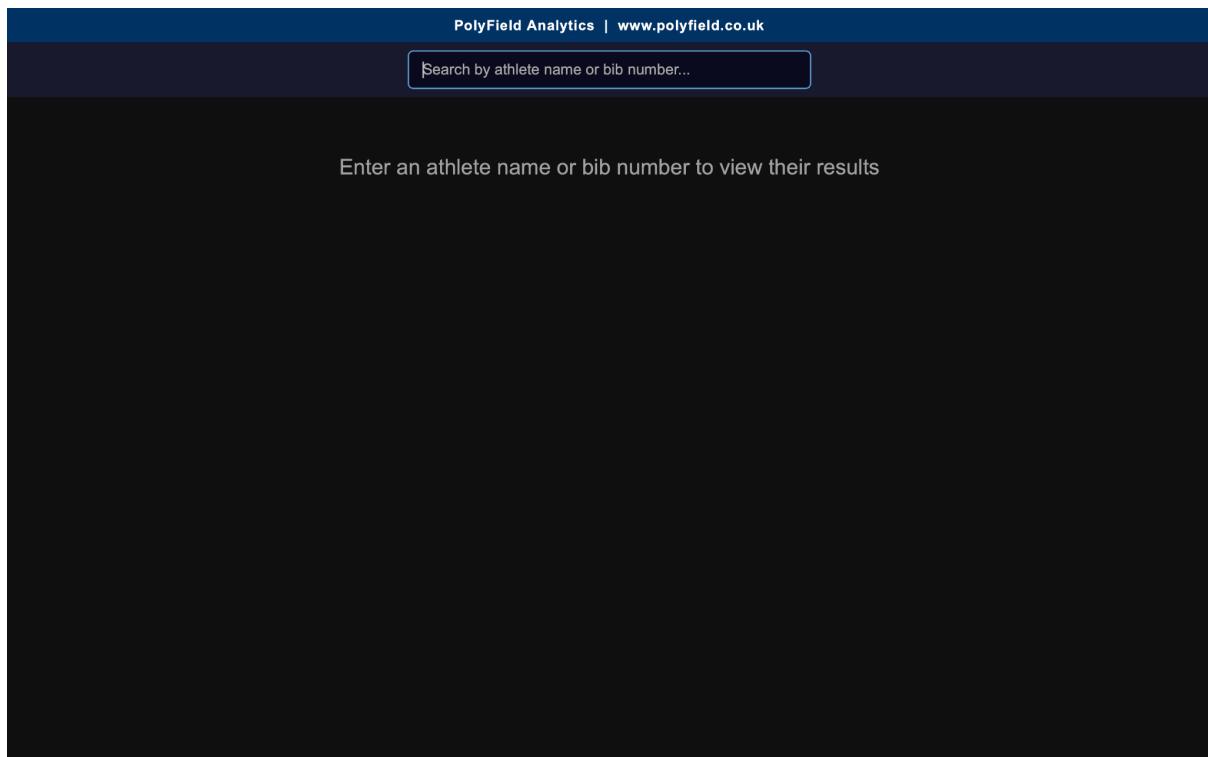

Results - Page 3 of 3						
U17G 60mh h2			400H Women A			-2.2 m/s
1	1081 Humphrey Laila (Invicta East Kent AC)	9.66	1	S SLH A String	SLH	1:15.25
2	1092 Thorpe Freya (Windsor Slough Eton & Hour	9.67	2	SS SLH B String	SLH	1:18.69
3	1088 Sladden Dakota (SS Athletics)	9.69	3	C Croydon A String	Croydon	1:26.56
4	1093 Turner Rebecca (Dartford Harriers AC)	10.15				
5	1082 Ventress-Brett Tabitha (Swansea Harriers)	10.15				
400H Men A			100 Men Non Scoring Race 2			-2.1 m/s

<a href="#">Back</a>			<a href="#">Select Results Directory</a>	<a href="#">Full Screen</a>	Layout: <a href="#">2x2</a> <a href="#">3x2</a>	Mode: <a href="#">Rotate</a> <a href="#">Latest</a>
					Text: <a href="#">Smaller</a> <a href="#">Larger</a>	60%

The multi results view will display results in a 2x2 or 3x2 matrix layout. They can be configured to show the latest results or rotate through all available results. The text size can be adapted and a full screen mode is available, hiding the tool bar. Any mouse movement will temporarily popup the toolbar before hiding on inactivity again.

Results will paginate with a display of the current page at the top for tracking.

The search icon will take you to the self service results kiosk.

This can also be accessed by directly browsing to <IP-ADDRESS>:3000/athlete

The screen by default will display a search bar, here an athlete can search for themselves by name or bib number, populating a drop down list. Clicking on any name will display all performances of that athlete in the current results directory.

A screenshot of the application showing search results for "Jade". The search bar at the top shows "Jade" and has a "Reset" button. The main content area displays the athlete's information: "JADE BAKER" and "Bib #163". Below this, two result cards are shown side-by-side. Both cards have the text "T09 200M WOMEN" at the top. The left card shows "5th" and "31.53" with a "Tap to enlarge" link below it. The right card shows "11th" and "51.53" with a "Tap to enlarge" link below it.

Clicking on any of these result cards will display in full screen that result for photo opportunities.

Reset will wipe the current search.
